Redress of grievances was courteously asked by invitations asking the members of the board to meet the teachers last evening after school at the Washinston building. The request for a conference was ignored by the board, not one of whom appeared. It is stated that even the janitor manifested a hostile spirit and looked the school room door, compelling the teachers to depart through a window. One of the members of the board, when asked about the request for a conference, said that it the teachers had any grievance test should appear before the board.

A meeting of the school board was held last night and considerable routine work was disposed of. No reference was made to the request for a and "woman's rights." No contracts have yet been signed by the teachers affected by the reduction.

JOHNSON ACQUITTED.

The case against William Johnson, on trial in the district cours, was finished yesteriny everties, when the jury brought in a verdict of not guilty. The witnesses testified that the defendant was at home all of the time the night of the fire and that, therefore, he could not have been the rullty party. The case of R. H. Jones vs. B. H. Jones, two brothers and both lawyers, is being tried before a jury today. R. H. Is suing his brother for the collection of two promissory notes one of \$500 and one of \$1,500. J. N. Kimball of Orden is associate counsel for the defendant and J. M. Coombs for the prosecution. Both notes are lost.

Tomorrow is the day set for the hearing of the charge against Editor M. L. Snow, of the Bugler, on the charge of assault with a deadly weapon, with intent to do great bodily harm. The trial will no doubt be interesting.

Loss Talk of Gold Imports Both In New York and Abroad-Rumors of the Bank of England and the Silver Reserve Discussed From London-Active Demand For Silver Cortificates-The Cattle, Hog and Sheep Markets In General.

New York, Sept. 15 -- Today's market was extremely irregular but the average level of prices was lifted as a resuit of the day's operation. The strength shown was very aggressive in spois, but many of the shares recently active in the market moved scarcely at all. The Vanderbilts were again a cenall. The vand critic were again a center of strength on the reports of large increases in earnings and most of them advanced a point or more in the day's coursings. New York Central was heavily death in and advanced 1% on the estimated increase in the surplus for the current quarter of 3672,8%, and in the reported increase in the gross earnings for the first week in September of \$190,000. er of \$150,000. GAS UP TWENTY POINTS.

GAS UP TWENTY POINTS.

A jump of 29 points in Consolidated Gas, even though it was on a limited volume of transactions, was a sensational feature in the market. The recent esceptation which was centered in Union Pacific caused the advance in that stock and benefited the price to the extent of over a paint. Reports circulated of large increases in earnings turned aftention to General Electric and the stock rose at one time nearly 2 points. These elements of strength could not but serve to sustain the market find the advance of St. Paul 2 points. These elements of strength could not but serve to sustain the market find the advance of St. Faul and Burlington to new high record prices for the year were additional factors. But nevertheless there were comspicuous exceptions to the strength of the market. Sugar (common) which sold ex-dividend today, lost all of its early gain before the close. The coalers were somewhat heavy during the day but improved slightly before the close.

### TALK OF GOLD IMPORTS.

Less was heard today of the prospect of immediate imports of gold, the exchange market showed a steady tone, though very dull and no further hardening of the rate for money in the local market being perceptible. Exchange is still fully a cent above the gold importing point, but it germs evident that any material rise in money rates here would be met by gold imports and consequently by a check to the advance. One of the features of the day in Wall street was the sales of Standard Oll liquidation of certificates on the curb at 155g, which is 9½ points advance over the nighest previous price. There was considerable decrease in the volume of bond dealings, but the prices generally advanced. Total sales, \$2,543,000. United States bonds were % lower bid.

WHEAT CLOSED FIRM.

However, the Market Was Puzzling to Many Operators.

Chicago, Sept. 15.—Wheat was a puzzle at the opening. It was difficult to account for the 'ge advance with which the market started, the Liverpool market, which usually influences the opening tone of this market, showing an opening decline of 'ge'ad. It was claimed in a dispatch from Minneapolis that the threshing returns in the Dakotas and Minnesota Indicated a crop for the three states of not to exceed 125,000,000 bushels, but there was not much confidence here in such a low estimate. Paris was reported from 10 to 15 centimes higher at the opening, and the advance here was ascribed by some people to that. But the opening strength quickly faded.

Decomber, which closed yesterday at 50 miles. Neb., Sept. 15—Cattle—Recipts, Started today at 52 miles for the decline. It was abount to 92%. There was no statistical reason for the decline. It was apparently due to total lank of support, scarcely any demand ampearing until 93% had been touched. A recovery to 34 then ensued. But during the next two hours the bearishness that succeeded the momentary opening bulks became more prenounced and the price suffered accordingly. The market broadened as the price sank, and with such evidence before them that the bull clique had lost its grip, short sellers became more courageous and pressed their advantage. Chicago receipts were 7.0 carleads, of which 29 were contract. The quantity inspected out of store was 53,800 bushels.

Bolse, Ida., Sept. 15.—The striking of a rich claim in the Klondike, known as No. 10, is the sequel to a romance that was enacted in this city. Five years ago Charles A, Magaw arrived in this city, a poor cierk. Magaw was shortly forgotten by the gossip mongers, and not until within the last few days has its whereabouts been known. Through a letter written by Magaw to an attorney friend here the information has galried currency that Magaw is now in the golden Klondike and that he has dug a fortune out of No. 16.

He apparently knew nothing of the efforts being made here to reach him, and must have anticipated a good deal, for he wrote the Boise actorney narrating the facts of his strike and stating that he desired actor matters looked up in the facts of his strike and stating that he desired score matters looked up in anticipation of alimony proceedings when the news of his good fortune should become known, He gave his Klendike componen, but this the atterney will not, of course, divulge even to his warment friend.
